There are 15 Corporations, 121 Municipalities and 528 Town Panchayats in the State of Tamil Nadu. The total quantity of solid waste generation is 13422 Tons/day as reported by the local bodies out of which 12844 Tons/day of solid waste is being collected and 9423.35 Tons/day of solid waste is treated and 2301.04 Tons/day of municipal solid waste is land-filled in the landfill and dumpsites located in the State of Tamil Nadu. Local bodies which generate 5 TPD of municipal solid waste have applied for Authorisation. So far 224 applications received for authorization and Authorisation issued for the said applications.

#### **Collection, Transportation and Segregation of MSW in Tamil Nadu:**

The urban local bodies at several places have organized collection of MSW by house to house collection, by using collection bins, compactor bins, lorries using dust bins, etc. All the urban local bodies have partly started the source segregation of municipal solid wastes generated in their limits and are partly composting the biodegradable waste. Transport facilities such as dumper placer, tipper lorry, tipper tractor, trucks, etc. have been used by the Corporations for transportation of wastes and in some cases the vehicles are closed or pneumatic compactors are used in few corporation areas. Similarly, Municipalities and Town Panchayats utilize the transport facilities such as tractor trailer, dumper placer, tipper, tricycle, push carts etc.

#### **Solid waste Processing Facilities in Tamil Nadu:**

In the state of Tamil Nadu, various waste processing facilities like windrow composting, Vermi composting, Micro Compost Centres (MCC), Onsite Composting (OCC), Bio Methanation, Material recovery facilities and Incineration plants are being followed.

- 107 Biomethanation plants are established to process 230 TPD of Wet Waste. 529 Windrows composting plants and 263 Vermi Composting plants are functioning with capacity of 1242 TPD.

The Overall Processing percentage of wet waste = 72%.

- To dispose the dry waste generated in ULBs, 438 numbers of Material Recovery Facilities/Resource recovery centres have been sanctioned of which 431 Nos are completed and put in to use and remaining are in progress.
- 16,009 Tonnes of non-recyclable wastes generated are sent to cement plants/ sugar mills/ power plants for usage as fuel.
- 57 Incineration plants sanctioned to process 1716 TPD of combustible waste. So far, 19 Incineration plants with handling capacity of 390TPD have been established but not put in to operation. The TNPCB has not issued Consent to Operate under Water (P&CP) Act & Air (P&CP) Act to the said plants.

Recently, the Central Pollution Control Board has evolved a “Protocol for evaluation of technology for Waste Management” recently during June 2021 and the protocol prescribes that the proponent proposing new technology has to submit an application to the concerned SPCB/PCC in the prescribed format, which will be endorsed by TNPCB and sent to the CPCB for further evaluation.

In this regard, TNPCB has addressed the Commissioner of Greater Chennai Corporation, Commissioner of Municipal Administration, Director of Town Panchayats and the Director of Rural Development & Panchayat Raj Department that the establishment of MSW incinerators (other than Waste To Energy incineration plants) with the provisions for heat/energy recovery need to be evaluated as per the said protocol and requires CPCB’s direction for implementation.

#### **A Summary statement on progress made by local bodies in respect of implementation of schedule II.**

Most of the Corporations, Municipalities and Town Panchayats in the State of Tamil Nadu have been instructed to adhere to the standards prescribed in schedule II of the Municipal Solid Waste Rules, 2016 without fail.

TNPCB collects samples of ground water in the vicinity of the dumpsites and samples of leachate from the dumpsites, as one of responsibilities of monitoring the compliance of standards regarding ground water, ambient air, leachate quality, TNPCB also conducts Ambient Air Quality survey at the landfill site and at their vicinity.

Ground water quality have been monitored at the vicinity of solid waste dumpsites pertaining to Corporations namely, Chennai, Coimbatore, Madurai, Trichy, Erode, Vellore, Nagercoil, Dindigul, Hosur, Thanjavur and Avadi and 55 Municipalities.

Ground water quality with respect to the parameters viz., total dissolved solid, chlorides, total hardness in the vicinity of the landfill sites pertaining to Corporations marginally exceeds the drinking water standards. However, habitations in the vicinity are provided with water supply through the respective ULBs.

Urban Local Bodies are adopting Micro Compost Centre (MCC) methodology for composting in which the leachate generated is recycled. Hence, leachate characteristics is not analysed at these facilities.

Ambient Air quality monitoring is monitored at the vicinity of solid waste dumpsites pertaining to Corporations namely, Chennai, Coimbatore, Madurai, Nagercoil and Dindigul. The survey revealed that the particulate matter PM<sub>10</sub> has marginally exceeded the standards in some Corporations

Continuous Ambient Air Quality Monitoring stations have been installed at the vicinity of Kodungaiyur and Perungudi dumpsites
